

Spool Sizer

MODEL # 11300

The Spool Sizer is an ideal solution for sizing small berries to a specifically desired diameter. This is a fast, effective, and accurate method, insuring maximum product flow.

How It Works

Product flows over the spool sizer, which singulates the product. Small-sized product falls through spools and is conveyed away. Over-sized product flows over the end of the sizer. Exact diameter sizing is guaranteed.

Exact diameter sizing guaranteed!

Features

- Compact design saves space
- Wash down duty frame and drive components
- Precision machined spools create the round hole passage for small product to drop through

Available Options

- Casters
- Variable speed drive
- Elevating discharge
- 34", 40", or 46" widths available
- Aluminum or stainless spools
- 5/16"-5/8" hole sizes
