

CLAMSHELL WEDGE WHEEL DENESTERS

PATENT PENDING

ACHIEVE CONSISTENT & ACCURATE CUP PLACEMENT WITH FEWER DOUBLES

Wedge Wheel Denester

- **All stainless steel construction**
- **Quick and simple container changeover**

Clamshells are staged in their custom fit cartridges over top of an indexing conveyor or the live belts on our Single Lane Adjustable Filler. As the hopper eye (included) mounted on your filler's hopper recognizes berries and a need for containers below, the denester simply 'flicks' the container down onto the conveyor. Changing container sizes is as simple as removing one cartridge and replacing it with another, and your ready to keep denesting.

The most exciting feature of this machine is that it is built around the footprint of specific containers. In order to ensure the highest level of speed and accuracy, we have essentially taken the need for making adjustments in the field entirely out of the picture by giving you container specific cartridges that are guaranteed to denest your containers with nothing more than some initial fine tuning.

* Wedge Wheel Denester Capacities

Capacity (Containers per Minute)
300+ containers per minute

** Wedge Wheel Denester capacities are dependent on the filling rate, and the speed of the indexing conveyor / live belts that containers are denesting onto.*

Wedge Wheel Denester Options
