Capable of taping up to 30 boxes per minute, the semi-automatic BEL150 Tape Machine is the perfect box taping system for your end-of-line box taping needs. The BEL 150 ensures that boxes keep their square shape while providing superior tape application, long lasting performance, and user-friendly case changing capabilities. The machine features a corrosion resistant frame which guards agains contamination and peeling paint, a built-in safety system that protects against power interruption, quick and easy maintenance with minimum downtime and standard DEKKA 22 stainless steel tape heads
