

METAL DETECTORS

METAL DETECTION

A HIGH SPEED, HASSLE FREE, STAND ALONE METAL DETECTION SYSTEM

Stand-Alone Metal Detector

- **Pneumatic flip gate for no-hassle metal debris removal**
- **Stainless steel easy-clean design**

As berries are conveyed through the stand-alone conveyor's metal detecting section, this powerful metal detector picks up the smallest metal scraps and sets off the trigger to activate a beacon light above the machine, and drop the pneumatic dump gate, which allows the contaminated fruit to be collected into a lug for the further inspection to ensure that any berries that continue down your packing line are free of any metal debris.

Metal Detector Capacities

Working Width	Capacity (lbs per hour)
32"	8,000
40"	12,000

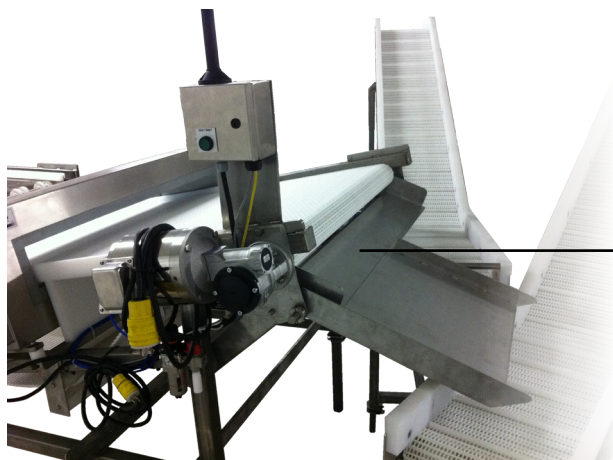

Metal Detector Options

Options
Pneumatic Flip Gate
Detection Beacon Light

Pneumatic Flip Gate —————
activated when debris is detected

Chute carries detected debris to the lug below
