

FULL-BOX METAL DETECTORS

METAL DETECTION

ENSURE YOUR FINAL BOXED PRODUCT IS FREE OF METAL DEBRIS

Full Box Metal Detector

- Final inspection after container is sealed
- Accommodates all non-metal containers such as cardboard, plastic, and more
- All stainless steel construction
- Wash-down duty
- Easy to clean conveyor

Ensure your final packaged product is free of metal debris with a Lakewood Full Box Metal Detector. This machine is able to sense the smallest unintended metal scrap in your fresh or frozen food lines.

A conveyor moves the boxed or packaged product through the metal detector. Boxes that contain metal are diverted and isolated from the main flow of the line.
